### **DETAILED ACTION**

1. The indicated allowability of claims 18 and 22 is withdrawn in view of the newly discovered references listed in the following rejection.

#### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 18 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Park et al., hereinafter Park (U.S. Patent 6,278,160) in view of Microelectronic Circuits, a book by Sedra and Smith.

Park discloses in figure 6, a substrate 100; a first drain region 112, at the right hand side of the figure, disposed in the substrate; first and second gates, shown as regions 104 at the left and right side of region 106, respectively, are disposed on their respective dielectrics, 108, and are on a first and second channel region, at the left and right side of the middle source region 106, respectively; and a second drain region (112 at the left hand side of the figure) is in the substrate.

Park does not disclose a pad connecting the first gate to the second drain.

Sedra and Smith disclose on page 549, figure 6.43(a), that a current source can be formed as shown in the figure by connecting the gate of a first transistor Q2 to a

drain/source of the second transistor Q1, wherein the transistors have common (connected) sources as can be seen in the figure. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to make such a connection in Park's structure in order to make a current source.

#### ***Allowable Subject Matter***

4. Claims 1-16 are allowed.
5. The following is an examiner's statement of reasons for the allowable subject matter:

The primary reason for the indication of the allowability of claims 1-16 is the inclusion therein, of the limitation of a clamp circuit and an interface circuit share a common device element indicated by applicants' argument in the Appeal Brief dated 6/11/02.

#### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dana Farahani whose telephone number is (703)305-1914. The examiner can normally be reached on M-F 8:00AM - 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on (703)308-4918. The fax phone numbers for the organization where this application or proceeding is assigned are (703)308-7722 for regular and After Final communications.
